White color

Gray color

COMPOUND MODE

ADVANTAGE

01

Wide range of uses

Suitable for schools, libraries, hospitals, and government with high space utilization

02

Sturdy & durable

High quality cold rolled steel sheet, Anti-dumping structure, ensure it has a long-terms usage life

03

Eco-friendly powder coating

Electrostatic powder coating, environmentally friendly, non-toxic and odorless

04

High-strength load-bearing capacity

Thickened steel plate to ensure the shelves with a strong load-bearing capacity, it can easy yo adjustable

05

Easy to open

Use transmission device, easy to move

06

Special Design

With anti-trip function, braking System, ensure safety

Why use compact shelving?

The Compact shelving storage system has the characteristics of high capacity and small footprint, which can save up to 70% of the ground space compared with traditional file storage. The product structure is reasonable and the craftsmanship is excellent. It can drive various file cabinets full of documents and materials with only a little force, and it is extremely convenient to access documents. The intensive file storage system has complete specifications and large options. It is widely used in libraries, offices, archives, scientific research departments, and medical departments to store documents and materials of various specifications.

Customized service —— the core value of DBin

Personalized customized service, which greatly meets the customized needs of customers.

DBin's service concepts and service standards are based on consumers, and actively promote service branding, service tangibility, full service, service channelization, service initiative, service standardization, service issue, and service differentiation.

Actively meet customer needs

- 1.Keep in touch with customers frequently and maintain a good and harmonious relationship and atmosphere with customers
- 2.Special treatment for special customers, to provide customers with special services and treatments.
- 3.In-depth understanding of customer needs, to provide customers with systematic solutions, in a wider range of heart and support customer development and enhance customer purchasing power

Production process control

- 1.Full monitoring of the production process, let customers feel that they are in the factory
- 2.Develop an order tracking plan according to the delivery time of each order, follow up the production progress in time.

One-to-one professional service

- 1. Provide one-to-one follow-up service for each customer with a dedicated person and post, and be responsible for the service of the entire process of each business from the customer's order
- 2. Standardized provision of loading packaging, loading, loading, photo shipping schedule, departure reminder, arrival reminder, receipt of documents, etc., so that customers can keep track of the shipment status of the goods at any time

After-sales service —— the extension of DBin's value

Perfect after-sales service, effectively relieve consumers' worries.

An excellent after-sales service and an excellent brand often start from the details. Improve the trinity service system of "pre-sales, in-sales, and after-sales", commit to personalized service concepts, make every effort to guarantee customer service satisfaction, and finally build the DBin brand with characteristic after-sales service.

Efficient pre-sale service

- 1. Update new product trends on DBin's official website and social media in time
- 2. All customers can order by phone. For customers who order special products, they can provide the appearance structure drawings designed and drawn by Auto CAD and Slidworks in the shortest time according to your requirements for your confirmation or suggestions for improvement.
- 3. The business team provides services online 7* 24 hours.

Timely in-sale service

- 1. The company delivers to the door with the best packaging and transportation method and puts it in place
- 2. The company has professionals to install and debug products on the customer site

After-sales service with lifetime warranty

- 1. A professional after-sales service team answers after-sales questions online 7*24 hours
- 2. The product itself is defective, and the company can exchange new products or provide maintenance at any time
- 3. For customers who use the company's products, no matter how long you have used them, the company is responsible for refurbishment, and the refurbishment fee and freight will be charged as appropriate
